Email: maxryaguzov@gmail.com

Summary

Lead Frontend Engineer with strong hands-on expertise in React, TypeScript, and scalable web architecture. Experienced in building frontend and full-stack systems with Next.js, custom SSR solutions, and backend-integrated product architectures. Strong background in monorepos, microfrontends, design systems, performance optimization, CI/CD, and legacy modernization. Focused on maintainable systems, engineering efficiency, and reliable product delivery.

Skills

Core: React, TypeScript, JavaScript, Next.js, NestJS

Architecture: Frontend Architecture, Scalable Web Architecture, Monorepos, Microfrontends, Design Systems, Custom SSR

Engineering: Web Performance, Performance Optimization, Legacy Modernization, CI/CD, Developer Experience

Leadership: Technical Leadership, Cross-functional Collaboration, Mentoring

Modern Workflows: AI-assisted Development

Experience

Systeme.io / Frontend Team Lead

JULY 2024 - PRESENT

Owned 3 production applications and 7–8 shared libraries, driving technical direction across product and platform-level frontend development

Designed and implemented a microfrontend monorepo connecting shared business domains, shared UI, and i18n foundations across 28 languages

Reduced bundle size by 3x while improving reuse, maintainability, and scalability of the shared frontend platform

Owned delivery from architecture and build pipelines to AWS rollout and production support

Worked alongside Product on application evolution, implementation trade-offs, and business priorities

Introduced LLM-based automation and documentation workflows across frontend projects to improve engineering efficiency

Systeme.io / Frontend Developer

SEPTEMBER 2022 - JULY 2024

Built core product systems using React, Next.js, NestJS, and custom SSR for frontend and full-stack product initiatives

Built and maintained a TipTap-based editor with custom product workflows and complex content behavior

Led the DraftJS-to-TipTap migration with visual compatibility and data migration, allowing the legacy editor stack to be retired

Improved application reliability and performance by resolving memory leaks, modernizing legacy code, and optimizing bundle behavior

FONBET CYPRUS / Frontend Developer

OCTOBER 2021 - SEPTEMBER 2022

Contributed to a large-scale back-office product within a complex legacy environment

Implemented and released multiple product sections for internal operational workflows

Extended internal frontend libraries and built custom solutions for business needs

Collaborated with Design and QA to deliver reliable, cross-browser compatible, and maintainable interfaces

Freelance / Web Developer

DECEMBER 2020 - OCTOBER 2021

Built small web applications and reusable UI components using JavaScript, React, and Redux

Delivered frontend work focused on responsive layouts, usability, and maintainable code

Developed personal and freelance projects to strengthen practical expertise in modern frontend development

Education

Moscow Aviation Institute (National Research University)

SEPTEMBER 2017 - SEPTEMBER 2021

Bachelor's Degree, Infocommunication Technologies and Communication Systems

Languages

English - Professional working proficiency

Russian - Native

Ukrainian - Native

Spanish - Elementary
